EXPERIENCE

LECON, Inc

Houston, Texas

Project Manager/ Equipment Manager

July 2003 – August 2019

Project Manager

- Managed large-scale civil construction projects consisting of mass excavation, storm sewer boxes/ piping installation, siphon construction, offshore breakwater/shoreline revetment, levee improvements, articulated concrete block installation, dewatering activities and concrete paving/structures
- Administered submittals, RFIs and pay applications for over 50 various projects with budgets ranging from \$2 to \$30 million
- Monitored daily production and work quality to ensure projects remain on schedule and within budget
- Maintained internal and external communication throughout all projects facilitating between the jobsite and project owners or representatives
- Collaborated on projects with the United States Army Corps of Engineers, Harris County Flood Control District, San Jacinto River Authority and numerous commercial and residential private developers

Equipment Manager

- Managed and maintained an equipment fleet of over 250 assets, consisting of excavators, bull dozers, articulated off-road trucks, wheel loaders, backhoes, compact track loaders, sweepers, centrifugal pumps and other supporting jobsite equipment
- Managed approximately 10 employees including mechanics, delivery drivers and fuel truck drivers
- Implemented an equipment management software program to track fuel delivery, equipment maintenance and repair work orders in addition to tracking mechanics' daily time cards for payroll
- Monitored expenses including purchases, rentals, maintenance/ repair and fuel usage
- Evaluated equipment replacement decisions and led the purchasing and leasing processes, transacting quarterly
- Established usage and standby rates to charge projects and offset equipment ownership costs
- Coordinated repairs, maintenance, procurement and sales of equipment and scheduled heavy haul transportation for equipment moves

Site Safety and Health Officer (SSHO)

- Served as the SSHO on projects, leading site-specific employee and subcontractor safety orientation
- Identified project site hazards and created safe alternatives while maintaining production
- Reviewed the Activity Hazard Analysis for each aspect of a project
